

“Provide startups in your portfolio with talents they need in few days not in months”

As Venture Capitals, you are committed to supporting startups and helping them achieve their goals. By partnering with dream.jobs, startups can access a range of benefits that will make the recruitment process easier, more efficient, and more effective.

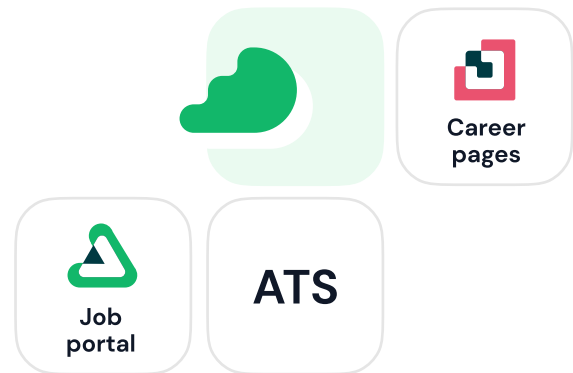

Venture Capital can play a crucial role in helping startups find the best candidates for their teams. That's where VC comes in a way. Venture Capitals can provide startups with a more complex and experienced recruitment process with access to a wider network of potential candidates, as well as expertise, credibility, and support with the hiring process and ongoing growth and expansion.

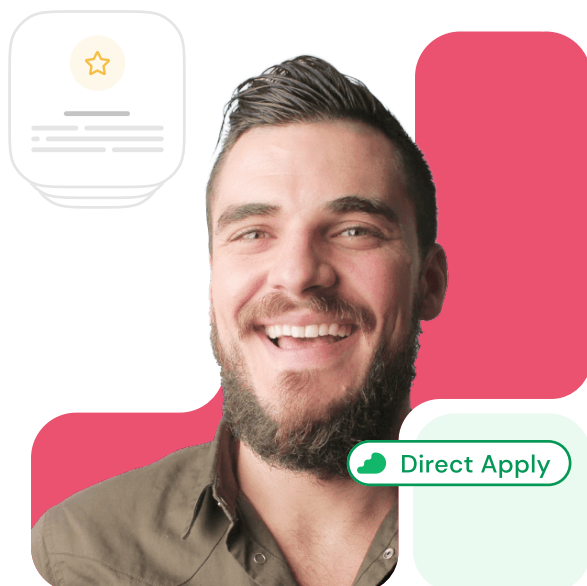

“Boost hiring of invested startups bring more Unicorns and ROI”

Partnering with dream.jobs you can offer Customisable Career Pages and an Internal Job Portal also a range of benefits to the startups you work with. One of the key benefits is the integration of all startups into one central Applicant Tracking System (ATS), which streamlines the hiring process and makes it easier for startups to manage their candidates. Additionally, startups also have the option to have their ATS within our system, providing them with even more control over the recruitment process.

increase visibility and attract top talent. By leveraging the credibility of a VC company name, startups can position themselves as desirable employers and attract candidates who might not have considered them otherwise.

For startups who may not have experience with hiring processes, working with a VC can provide much-needed resources and support. We understand that it can be challenging to find good candidates, but our team of experts is here to help. With VC guidance and support, startups can create better job descriptions, reach more candidates, and ultimately hire the best talent for their teams.
